

Safe & Cost-effective

High-purity Solvent Packaging and Dispense

Protect your product quality and integrity with IPI's well-proven packaging and dispensing systems!

IPI brings you a wide range of safe, cost effective solutions for solvent packaging and dispense. We supply many of the market leading solvent and laboratory equipment providers. The sealed, stainless steel container system effectively addresses the problem of storing and dispensing large volumes of high purity solvents.

Application

Suitable for a wide range of solvents:
Acetone, acetonitrile, ethanol, methanol, methylene chloride, tetrahydrofuran, xylene etc.

Available as stand alone dispense systems or as part of an existing dispense or solvent purification system as supplied to hospitals and laboratories worldwide.

Key benefits

The Macro Valve System provides product integrity, quality and safety for storing and dispensing many specialty chemicals such as:

- Enhanced safety in solvent handling.
- Ease of handling, container changeover.
- Security and protection of product integrity.
- Enables inert gas dispense.
- Reduced storage space requirement.
- Reduced waste disposal costs – solid and liquid.
- Reusable for many years.
